

# THE NON-INVASIVE WAY TO CORRECT BREAST ASYMMETRY

An adjustable solution for restoring breast symmetry — and confidence

## NEW: BALANCE ADAPT AIR BREAST SHAPERS

### THE IMPACT OF BREAST ASYMMETRY

- Psychological and emotional issues can significantly affect confidence and quality of life.
- Skin irritations and discomfort can result when a bra no longer fits.
- Tension in neck, shoulders, back and poor posture may be caused by difference in weight.

### SHAPERS — AN EFFECTIVE SOLUTION FOR BREAST ASYMMETRY

- Quality silicone breast shapers, such as the Balance Adapt Air, are an excellent non-surgical solution for restoring balance and confidence.
- Shapers are popular with the more than 70% of women who undergo breast-conserving surgery.
- Shapers feel natural to the touch, and are invisible under clothing for women with natural breast asymmetry or breast malformation, or who:
  - have had multiple biopsies
  - have had reconstruction with changes over time
  - are undergoing expander therapy prior to a reconstruction

reddot winner 2020

Our award-winning air chamber technology allows a woman to comfortably adjust the shaper for a close fit to her chest wall and to restore breast symmetry by simply adding or releasing air. Available in two shapes, Delta and Varia.

## TALK TO YOUR PATIENTS ABOUT BREAST SHAPERS

Amoena offers a comprehensive range of shapers which are available on prescription in many countries. Discuss the option with your patients and pass on the brochure. You can also help your patients find their nearest medical retailer by directing them to: [amoena.com/findmyretailer](https://amoena.com/findmyretailer)

# BALANCE ADAPT AIR FOR EXPANDER THERAPY

- Do you work with the expander method in your practice for subsequent reconstruction with implants?
- Do your patients need a customisable balancing of the silhouette until the implant is inserted?
- Are you less satisfied with the current options on the market?

Then we have the solution for you. As part of the Amoena Solution, we offer you individual and innovative solutions for your reconstruction procedures.

## AMOENA BALANCE ADAPT AIR SHAPER - THE FIRST CHOICE FOR THE EXPANDER METHOD

Use our innovative and intelligent shaper Balance Adapt Air during the expander method.

- Individually adjustable volume over the entire duration of therapy
- A balanced and symmetrical silhouette for your patient until the implant is inserted
- Pleasant wearing comfort and natural movement behaviour for a positive body feeling

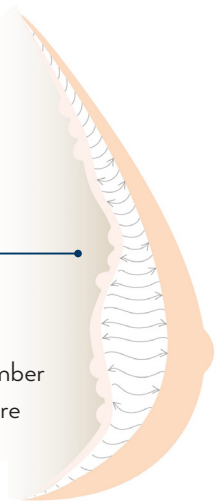

WITHOUT SHAPER

WITH BALANCE ADAPT AIR

The adjustable air chamber replaces volume where it is needed
